AIM: To Study Agile Methodology and Test case Management using JIRA Tool

Theory:

Jira is a software development tool that helps team's plan, track, and release software projects. It's a popular tool among software development teams.

JIRA is a widely used issue tracking and project management software developed by Atlassian.

The theory behind JIRA revolves around several key principles and concepts:

Issue Tracking: At its core, JIRA is designed to help teams track tasks, bugs, features, and other issues within a project. It provides a centralised platform for capturing, organising, and prioritising these items.

Agile Methodologies: JIRA supports agile methodologies such as Scrum and Kanban, enabling teams to plan, track, and deliver work in iterative cycles.

Agile principles emphasise collaboration, adaptability, and delivering value to customers.

Workflow Management: JIRA allows teams to define custom workflows that represent the lifecycle of an issue from creation to completion. Workflows can include various statuses, transitions, and conditions to reflect the specific processes followed by the team.

Customization: One of the key strengths of JIRA is its flexibility and customization options. Teams can tailor JIRA to their specific needs by creating custom issue types, fields, workflows, and project configurations.

Collaboration and Communication: JIRA facilitates collaboration among team members by providing features such as commenting, mentioning, and attaching files to issues. It also integrates with other Atlassian products like Confluence and Bit bucket for seamless communication and knowledge sharing.

Reporting and Analytics: JIRA offers robust reporting and analytics capabilities, allowing teams to gain insights into their project progress, team performance, and other key metrics. Users can create custom dashboards, charts, and reports to monitor and analyse project data.

Integration: JIRA integrates with a wide range of third-party tools and services, including development tools, CI/CD pipelines, customer support systems, and more. This integration ecosystem enables teams to streamline their workflows and improve productivity

Scalability and Performance: JIRA is designed to scale with the needs of growing teams and organisations. It can handle large volumes of data and users while maintaining performance and reliability.

The image displays two screenshots of the Jira onboarding process, likely from a web browser window.

Top Screenshot: "What types of work do you need?"

This screen is titled "What types of work do you need?" and includes the subtitle "These form the building blocks of your space." It lists five types of work items, each with a checkbox and a description:

- ☒ **Task**
A small piece of work.
- ☒ **Story**
A requirement expressed from the user's perspective.
- ☒ **Feature**
A broad piece of functionality.
- ☒ **Request**
An ask for assistance.
- ☒ **Bug**
A problem that needs fixing.

Below the list, it says "Don't worry, you can change these later." and a "Next" button is visible.

Bottom Screenshot: "Jira's better when used together"

This screen is titled "Jira's better when used together" and includes the subtitle "Jira works better with your team onboarded. Invite a teammate to try it out with you." It provides two ways to share the link:

- Share via link:** A text box containing the URL `https://tsect23.atlassian.net?continue=https%3A` and a "Copy link" button.
- Invite via email:** A text box containing the email address `e.g. maria@company.com`.

At the bottom, it says "This site is protected by reCAPTCHA and the Google [Privacy Policy](#) and [Terms of Service](#) apply." and a "Do this later" button is visible.

The background of both screenshots shows the Jira interface with a "My Software Team" board and a "Backlog" list.

Name: Viren Jagiasi

Batch: T23

Roll No. 131

The screenshot displays the Jira web interface in an Incognito browser window. The address bar shows the URL: `peeya.atlassian.net/jira/software/projects/SCRUM/boards/1`. The browser's tab bar includes several open tabs: (P1) WhatsApp, SEPM Manual, SEPM - Google D..., Experiment 6 - G..., [JIRA] (Peeya Gur..., SCRUM Sprint 0, Spaces - Jira, and a plus sign for more tabs.

The Jira interface features a left-hand sidebar with navigation options: 'For you', 'Spaces' (with a plus icon), 'Recent' (listing 'My Team'), 'More spaces' (with a right arrow), 'Recommended' (listing 'Collect IT requests' with a 'TRY' button), and 'More'. The main content area is titled 'My Team' and includes a search bar, a '+ Create' button, and a 'Premium trial' badge. Below the team name, there are tabs for 'Summary', 'Backlog', 'Board' (which is selected), 'Calendar', 'Timeline', 'Pages', and 'Forms'. The 'Board' tab shows a Kanban-style workflow with three columns: 'TO DO' (1 item), 'IN PROGRESS' (1 item), and 'DONE' (0 items). 'Task 1' is in the 'TO DO' column with a due date of 'Feb 8, 2026' and a checkbox labeled 'SCRUM-1'. 'Task 2' is in the 'IN PROGRESS' column with a due date of 'Feb 13, 2026' and a checkbox labeled 'SCRUM-2'. A 'Complete sprint' button is located at the top right of the board. A 'Quickstart' button is visible in the bottom right corner of the interface. The Windows taskbar at the bottom shows icons for the Start menu, File Explorer, Microsoft Edge, and other applications, with a system clock indicating 1:25 on 2/3/24.

This screenshot shows the Jira Backlog view for the 'T23 Team' space. The interface includes a sidebar with navigation options like 'For you', 'Spaces', and 'Recent'. The main content area displays a search bar, a '+ Create' button, and a 'Premium trial' badge. Below these, there are sections for 'SCRUM Sprint 1' and 'Backlog'. The 'SCRUM Sprint 1' section shows a task 'SCRUM-1 Task 1' with a 'TO DO' status and a due date of 'Feb 8'. The 'Backlog' section shows a task 'SCRUM-3 Task 3' with an 'IN PROGRESS' status. The bottom of the screen shows a Windows taskbar with various application icons.

This screenshot shows the Jira 'For you' view. The interface includes a sidebar with navigation options like 'For you', 'Spaces', and 'More'. The main content area displays a search bar, a '+ Create' button, and a 'Premium trial' badge. Below these, there are sections for 'Recent spaces' and 'Worked on'. The 'Recent spaces' section shows a card for 'T23 Team' with a 'My open work items' count of 1. The 'Worked on' section shows a task 'Task 1' with a 'To Do' status. The bottom of the screen shows a Windows taskbar with various application icons.

Conclusion: Hence, we have successfully implemented Agile Methodologies in JIRA.
